

Shape Hunting in Northampton

You might be used to seeing flat shapes in a geometry or art class but those same shapes are hiding all around you! Take a walk down your street, Main Street, or anywhere in between, and see how many you can find. Check houses, buildings, stores. Make sure you look up, look down, and try to see what's hiding in plain sight in the places you walk by every day.

Triangle

Statue *shaped* like a person

One shape inside another shape

Sphere

Something with a round edge –
not a sphere

Here's a space to draw – find a shape
you don't know the name of!

Octagon

Shape painted on a building

Shape made out of brick that isn't a
rectangle

Extra Challenge: how many differently shaped window can you find?
